Scar Revision Aftercare Instructions (Cyst Removal)

- You should wash the area with mild soap and water.
- Apply Vaseline as needed.
- Sutures will remain in place for one week after your procedure.
- Take antibiotics as directed after the procedure.
- Sun protection is very important because UV rays can darken scars.

GENERAL INSTRUCTIONS

IF YOU HAVE ANY URGENT QUESTIONS ABOUT FEVER, FLUID COLLECTION, NEW REDNESS, POSSIBLE INFECTION, ETC., PLEASE TEXT DR. CAMP 612-208-4179.

If you have general questions about recovery or followup appointments, please call or text the office 612-424-2767 or scheduling@echelonspecialists.com.
